Megan Sleezer

1503 NE 87th St, Vancouver, WA 98665   Phone: (360) 292-9873

Email: megan.sleezer@gmail.com   LinkedIn: https://www.linkedin.com/in/megan-sleezer-664935116/

Portfolio: https://mslee001.github.io/portfolio.html   GitHub: https://github.com/mslee001

OBJECTIVE

To obtain a software engineer position in a high paced environment so that I can enhance and grow my skill set.

TECHNICAL SKILLS

HTML, CSS, Javascript, jQuery, Node.js, Bootstrap

PROJECTS

StarPlannr

A web app to provide information on whether it'll be a good day to look at the stars. Given a date and location, a score is given based on cloud opacity and weather conditions.
Link: https://mslee001.github.io/StarPlannr/

Weather Dashboard

Using a third party API, this web app will display weather information using a location input by the user. The current weather will display along with a five day forecast. Each city that is searched will appear in a list on the left.
Link: https://mslee001.github.io/Weather-Dashboard/

Work Day Scheduler

This work day scheduler is for the current day. The user can input tasks in given timeblocks and save each task to local storage. The timeblocks change color to show past, current, and future. When the page is refreshed the data in local storage will display until cleared.
